**StormVista**

## **Developer Intern for Commodity Weather Group**

An energetic and enthusiastic meteorological developer is being sought for a software development summer internship with the Commodity Weather Group (CWG). **This paid internship is for Summer 2024 and completely remote.**

### **Required Skills:**

- Currently pursuing an undergraduate degree in meteorology or closely related science
- Experience in any programming language or web development experience
- Excellent written and verbal communication
- Self-motivated individual
- Creative, positive-minded personality
- Ability to collaborate in team environment

### **What you will do/learn:**

- Work with and learn from a team of experienced developers
- Improve API documentation
- Create / update client facing webpages
- Develop scripts to meet project objectives
- Learn about Energy and Agriculture commodities

CWG consults for hundreds of companies in energy/agriculture risk management, including renewables, crop data, and weather-driven demand information on short-term to seasonal time scales. CWG also owns/manages the StormVista weather models service.

CWG has a very high client retention rate with extremely low employee turnover. The open organizational structure allows all team members to play a significant role in the future growth and development of the company.

**Please submit a one-page resume by April 16<sup>th</sup> end of day to:**
